NG Kütahya Seramik *About*

Founded in 1989 with the vision of Nafi Güral, today NG Kütahya Seramik, under the leadership of Erkan Güral, is one of the global players in the ceramics industry with its 36 years of experience. One of the major producers in Türkiye, NG Kütahya Seramik advances its position in international market day by day thanks to its high quality and innovative mindset.

Our innovative and sustainable vision underpins every step of our production processes. Embodying our proprietary finishing technologies and genuine designs, our NG SLIM and NG STONE brands represents our sector globally.

Our broad product portfolio goes beyond floor and wall tiles to include innovative solutions such as large-size porcelain tiles, 160x320cm porcelain slab countertops, and 3mm-thick porcelain slabs for exterior siding. In this way, we offer architectures, interior designers, building professionals and designers with more free, creative and functional application areas.

We recognize our human resources as our most valuable asset; we enhance our employees' competencies through programs that support their development, and we build a strong value chain that extends from local to global with our inclusive human resources policy and environmentally conscious production approach.

With our vision focused on global success, we ensure every step we take resonates on a global scale, carrying this value rising from Kütahya to the whole world.

Sustainability at NG Kütahya Seramik
Sustainability Policy

We assume responsibility not only for today but also for the future through our respect for the environment, our appreciation for people, and our approach of continuous improvement in our business processes.

At NG Kütahya Seramik, we take a holistic approach to sustainability, considering its social, environmental, and economic dimensions. We integrate principles of sustainability into every area of our operations with a view to manage our effects on environment, society and business world in the best way, and to be a leader shaping the future.

NG Kütahya Seramik Corporate Sustainability Policy guides our all business processes, defining environmental, social and governance responsibilities of our company.

NG Slim

An Ultra Thin Touch to the Future of Architecture!

Developed with NG Kütahya Seramik's innovative vision, NG Slim offers flawless solutions to all the needs of contemporary architecture with its superior durability and wide range of applications, with a thickness of only 3mm. Offering large size alternatives such as 100x300 cm, 120x360 cm, and 160x320 cm, NG Slim adds value to interior and exterior designs by combining lightness, flexibility, and aesthetics with durability and high resistance.

Its non-flammable structure, resistance to chemicals and alkalis, low water absorption rate, and surface that maintains color and texture stability against UV rays preserve its original appearance for years. High performance of NG Slim porcelain tiles against differences in temperature makes it a preferred choice for all seasons.

It provides superior performance with its resistance to scratching and abrasion. Being easily cleanable and having anti-graffiti properties, it is hygienic and maintenance-friendly.

Its ease of processing saves time in projects, and its light weight facilitates transportation and installation processes. It can be used in many areas, from exterior cladding to furniture and cabinet doors; its thin and durable structure creates both functional and aesthetic differences in architecture.

NG Slim porcelain slabs meet all the expectations of architects, interior designers, and construction professionals with their advanced technology, surface alternatives, and high performance, while reflecting NG Kütahya Seramik's approach to quality in all details.
